

PIG CROP REPORT

DECEMBER 1965

Release:
December 23, 1965
12:00 Noon (E. S. T.)

The number of hogs and pigs on farms in the United States on December 1, 1965 totaled 54.3 million head, according to the Crop Reporting Board. This is a decrease of 7 percent from the 58.1 million head on farms a year earlier. Of the December 1, 1965 number, 17 percent or 9.1 million head were being kept for breeding purposes and the remaining 83 percent or 45.2 million head were for other purposes. The June-November 1965 pig crop of 38.6 million head was 5 percent less than the 40.5 million head pig crop of the comparable 1964 period. The June-November 1965 pig crop combined with the December 1964-May 1965 crop gives a total 1965 pig crop of 81.6 million head, 8 percent less than the 1964 crop. Reports on farmers' intentions indicate that 6.3 million sows will farrow during the December 1965-May 1966 period, 6 percent more than the 6.0 million sows farrowing during the same period of a year earlier.

1/ Does not include Alaska and Hawaii. 2/ Not available. 3/ As indicated by breeding intentions reports.
4/ Average number of Pigs per litter with allowance for trend used to compute indicated number of December-May pigs. Number rounded to nearest 500,000 head.

HOGS ON FARMS DECEMBER 1, 1965 DOWN 7 PERCENT

There were 54,283,000 hogs and pigs on the Nation's farms on December 1, 1965, a decrease of 7 percent from the December 1, 1964 number of 58,123,000 head. Hogs and pigs being kept for breeding purposes totaled 9,137,000 head, 4 percent more than the 8,749,000 head on hand a year earlier. Hogs and pigs, other than those being kept for breeding, totaled 45,146,000 head, 9 percent less than the 49,374,000 head on farms a year earlier. Classified by weight groups, the number of other hogs and pigs on hand December 1, 1965 and the percentage change from the previous year are: less than 60 pounds, 16,415,000 head, down 4 percent; 60-119 pounds, 12,253,000 head, down 8 percent; 120-179 pounds, 9,264,000 head, down 11 percent; 180-219 pounds, 5,465,000 head, down 13 percent; and 220 pounds and heavier, 1,749,000 head, down 22 percent.

In the 10 Corn Belt States -- Ohio, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, South Dakota, Nebraska, and Kansas -- the December 1 number of hogs and pigs on farms totaled 41,362,000 head, 8 percent less than a year earlier. In Iowa, the leading hog producing State, the number on hand decreased 5 percent, while the Illinois number decreased 9 percent and Indiana 14 percent. The 10 Corn Belt States accounted for 76 percent of the Nation's inventory.

JUNE-NOVEMBER 1965 PIG CROP IN U.S. DOWN 5 PERCENT

The June-November 1965 pig crop is estimated at 38,558,000 head, 5 percent less than the 1964 crop. The South Atlantic States showed an increase of 5 percent and the South Central States were up 4 percent. However, these increases were not enough to offset declines of 9 percent in the East North Central region and 5 percent in each of the North Atlantic, West North Central and Western regions.

The 5,299,000 sows farrowed during the June-November 1965 period was 6 percent less than a year earlier. These farrowings compare with the 7 percent decline indicated by the June 1, 1965 report on breeding intentions. Generally, the report as of June 1, 1965 indicated fewer sows to farrow during the June-November period in all areas of the Nation. However, the South Atlantic and South Central regions each show a 3 percent increase in actual farrowings as of December 1. June-November actual farrowings and June-November intentions reported last June as a percentage of a year earlier by regions are: North Atlantic, 94 percent now and 94 percent in June; East North Central 90 and 89; West North Central 94 and 94; South Atlantic 103 and 100; South Central 103 and 96; West 93 and 100.

There was a record average litter size of 7.28 pigs from the June-November 1965 farrowings. The previous record was 7.23 pigs per litter in 1963. Weather conditions for farrowings were

favorable during the June-November 1965 period and there was no serious outbreak of disease. These factors contributed to the increase in the average litter size.

The number of sows farrowing was less than a year earlier during all months of the June-November 1965 period except for a 5 percent increase in November. The declines are as follows: June, 7 percent; July, 8 percent; August, 9 percent; September, 6 percent, and October, 2 percent.

JUNE-AUGUST PIG CROP IN 10 CORN BELT STATES DOWN 10 PERCENT

The 10 Corn Belt States produced 14,731,000 pigs during the June-August 1965 quarter, down 10 percent from the 1964 total. The number of sows farrowed totaled 2,034,000 during the period, 10 percent less than a year earlier. The average litter size was 7.24 pigs for the June-August farrowings.

SEPTEMBER-NOVEMBER PIG CROP IN 10 CORN BELT STATES DOWN 4 PERCENT

The September-November 1965 pig crop in the 10 Corn Belt States totaled 14,311,000 pigs, 4 percent less than the 1964 crop. Sows farrowed in these States during the period totaled 1,959,000 head, with an average of 7.31 pigs per litter. Each of the States except Missouri show an increase in the average number of pigs per litter compared with a year earlier.

DECEMBER 1964-MAY 1965 PIG CROP IN U.S. DOWN 10 PERCENT

For the U.S., the December 1964-May 1965 pig crop was 43,080,000 head, 10 percent less than a year earlier. A total of 5,966,000 sows farrowed during these months, down 10 percent from a year earlier. Average pigs per litter was 7.22 compared with 7.23 a year earlier.

The December-May pig crop in the 10 Corn Belt States totaled 33,764,000, 11 percent less than a year earlier. This year's pig crop was from 4,669,000 sows, with an average litter size of 7.23 pigs.

ANNUAL U.S. PIG CROP DOWN 8 PERCENT

The total pig crop for the December 1964-November 1965 period in the U.S. was 81,638,000 head, 8 percent less than the preceding annual total. The annual pig crop in the 10 Corn Belt States totaled 62,806,000 head, 9 percent less than a year earlier.

DECEMBER 1965-MAY 1966 SOW INTENTIONS IN U.S. UP 6 PERCENT

U.S. hog farmers reported intentions to farrow 6,342,000 sows during the December 1965-May 1966 period, 6 percent more than a year earlier but 12 percent less than the average. Increases in sow farrowings

from December-May last year are indicated in all regions as follows: South Atlantic and South Central each up 13 percent; West, 7 percent; East North Central, 6 percent; West North Central, 5 percent; and North Atlantic region, up 2 percent.

If these intentions are realized and the number of pigs saved per litter follows the trend of recent years, the December-May 1966 pig crop would approximate 46.0 million head. This would be 7 percent more than in the December 1964-May 1965 pig crop.

Sows bred and intended for farrowing in the 10 Corn Belt States during December 1965, January and February 1966, total 1,657,000 head, 5 percent more than a year earlier. All States except Wisconsin show increases compared with a year earlier. Expected farrowings by months in these 10 States are: December, 420,000 sows, up 8 percent; January, 528,000 sows, up 4 percent; and February, 709,000 sows, up 3 percent.

Reported breeding intentions indicate 3,244,000 sows to farrow in the March-May quarter in the 10 States. This would be 5 percent more than a year earlier. All 10 States show increases compared with a year earlier, ranging from 3 percent in Ohio, Wisconsin, Missouri, and Nebraska each to 10 percent in Indiana.
